

You are in the army now

(episode 10 - (fri-)day 2)

TT agenda

- comments of our immediate military head command colonel Becker, head of our field (for celibates) hunters regiment 2 in (Köln)Bonn and head of our forest barracks here in Hilden on our first nine modules which covered the ...

national dimension

(yester-day 1)

- scuba diving (precedent oriented celibate hunting)

with white head command colonel Becker

two hour white head sea eagle sun rise hunt

(materials: hunt education vol. 1 – reading exercise)

6.30 p. m. - 8.30 p. m.

- maneuver review

(materials: hunt education vol. 1 – reading solution; vol. 2 – wanteds (no. 1 “tricky dick”))

9.00 p. m. - 12.00 p. m.

((nose dive)-to-day 2)

- deserved weekend

before we go on (major Tom) next week with the

international dimension

... of our divine (dis)mission ...

6.30 a. m

white head (sea) eagles, field for celibates hunter regiment 2, (Köln)Bonn (nose dive speed 160 km/h)
in eagle uniform, are shortly briefed during the transport to the eternal hunting grounds:

good morning, young eagles!

A ...

amusement

...Adventure day, your first nose dive hunt!

Good to see you all well rested and relaxed. Unconditional dive presumption. Remind always that otherwise your sergeants do not let you take part in our nosedive hunts. Imagine your nose down speed of about 160 km/h. although this is not faster than an old beetle it is fast enough to fold your car and you together if your (ordered) crash course is full speed frontal direction wall. Hitting the water wrong instead of grabbing the fish only and take off again breaks not only your neck likewise. You need to break down the nose dive in the right millisecond (not too early otherwise you remain hungry) attracted head down with a speed of 160 km/h. It is a reasonable speed, though. Imagine that our gold eagles are quite exactly twice as fast and reach a full speed of 320 km/h (only about 2 km/h slower than the fastest nose divers of all, black hawks! this is quite ambitious, for my happy colonel taste. however, gold eagles are somnambulist nose divers with perfect (flight) instincts and reactions).

So much as for a pre-speech. We have entered the air space above our eternal hunt grounds government dynasties and leave the airbus for our first excursion right now. Do not pull the rip cord too early, eagle hunters, and do not forget our maneuver review back in our barrack at 9.00 a. m.! May (y)our prey be productive! See you in the TT! ...

... and the colonel jumps eagles follow pair wise ... forming a pretty V as start formation ...

for what happened next see

working paper reflective reading exercise (before you come back here at 9.00 a. m.)!

9.00 a. m. TT (colonel Becker)

soldiers

what a delicious morning glory!

However, before we review our prey there are a few • • to be made very clear regarding modules 6 through 9. ...

... with respect to “conscience issues” (quote mT) with special effect on our prime value the mystery of truth after พี่น้อง was explained yesterday. Justice and health are how ever immediately touched when it comes to truth. Freedom might remain for our review of major Toms and your international dimension sketch in four to six weeks.

Keywords are

archives (module 6)

- **enemy compact** (clear and easy table diagram) (7)
- **divine acknowledgement of the human defence case** (8)

terrestrial consciousness (9)

so nothing to add to modules (7) and (8) since the • • are self comprehensive.
Internalize (7) ! or **doubt** (8) ...

remain topics archives (6) and natural consciousness (9).

I quote (from (6)) major Tom:

“He...” (peter) “...proved nearly all of the provable facts. I do not doubt his credibility regarding the unprovable facts. And by the way, he can certainly prove more of his case facts when we open the PAAA for him as well as more of the mankind case when the Vatican archives are opened.”

PAAA in Berlin and BA in Koblenz are as the main direct government archives included in our initial move as well as Museum König in Bonn as semi-governmental representative of scientific archives at which need to be looked case/pallets wise (like at private media by the way (broadcast included, not only print press)). Kirch (-e propaganda-) **head quarters** (principal and subs) sound representative enough in our initial move, don't they ...

(more general about archives (6) – in addition to their inclusion in the move – in our manoeuvre review)

... recall major Pete Tom (quote from (9)):

“**When they occupied the other side the clerics limited** spiritual information traffic in the same time and excluded mundane human life in general from it. Then they selectively accredited their statistically undetectable might addict class who they had formed and then recruited in their universities. They established their state servant and secretary networks (lead establishment) under the patronage of their arch dioceses within European populations and adjusted successively growing legislations accordingly.”

(remark: to be added behind European: ... and American ... subject to major Toms advance crash course. However, our collateral prey entitles me to mention it here already since the international dimension is going to be touched at least in a few moments anyway.)

Natural **terrestrial consciousness** (9) infrastructures which bridge our bright (pre- and after death-) life sides ...

(tel(os:/e-)connection between this and the other side, theolos: exclusive VPN for and of pope dynasties via Transsylvania and the 14th century into the 6th century to Benedictus I (second main stem), the east-gothic bastard son of a virgin, back into third century to great-great-grand-papas of Felix I (I) (5th century – the first “ostragothic” roman pope) and Urban (V)I (VI founder of pontifical academy of sciences Urban (members of Benedict order) side stem of Benedict) and via Pius II and middle age inquisition eventually back to Pius I (first main stem). The first roman catholic pope after they had declared their 2nd and 3rd hard core victims Petrus and Paulus representatives of God like Jesus, all three crucified. Felix dynasty succeeded by the Gregory clan. Pius succeeded by Pius, the last of which XII and patron of world war II.)

... generally, need to be understood as follows:

The term **terrestrial consciousness** shall mean profane both side consciousness. Extraterrestrial would accordingly mean divine (creation) consciousness which, however, is unreachable/unachievable for earth beings. Earth beings may, though, very well be aware of it for knowing, at least seeing, moon sun and milky way. Moreover the term terrestrial consciousness infrastructures shall include the whole terrestrial life space not only implement(ed) communication channels.

There is life on both sides. There is life space on both sides. There are life conditions on both sides. There is (micro)physical nutrition on both sides. Food on this side information (from this side) on the other side. They live with us. Inter side communication provides for their physical nutrition. They may be able to intra side communication but that is only carbohydrates without proteins and vitamins. They need it of course but its not sufficient and you become insane without weighed full range nutrition (peter experienced and told too many stories of their insanity on our other german side) like mere sensual communication on our side makes collectively insane and individually heavily handicapped.

Seizing all available nutrition means creating inhuman life conditions the act of genocide.

Major Tom explained “**when they occupied the other side the clerics limited spiritual information traffic** in the same time and excluded mundane human life in general from it.” He could also have said and excluded the other side from mundane (human) life in general.

Cutting off the other side from their heirs means further fulfilled genocide facts. Our ancestors are a quite easy identifiable group of our people. They are heavily attacked and desperately need us to defend and save them (and ourselves so).

Regarding both side communication (information sharing) means/media/mechanisms

internalize the two clear and easy table diagram alternatives (not even celibates know it better...) and then decide which capsule you really want to swallow the red (status quo) or the blue one (status pro - mission sette colline) which is going to restore the natural blue terrestrial communication concept. (... they only like the red version more)

However, "broadcast or other sensual" unnatural (mass) media do not necessarily harm. They harm when they replace natural communication and disguise or even ignore/ pretend unawareness (although directly informed) that natural "(spiritual) ultra short to endless long wave" (mass) media, our left hand(er)s, Delphi oracles, are being suppressed systematically. By the way, the oracle of Delphi used to be consulted by the greek military function ...

So much regarding communication means.

Soldiers, time is flying. These were my (opening) remarks in various (soldier sergeant and) officer directions with respect to modules 1 – 9.

The last hour after a five minute break now is dedicated to our hunt prey, eagles!

- - - 5 mins - - -

scuba maneuver review, soldiers

scuba hunt style is international precedent oriented. Remind our german authorization fundaments international law and higher love. Targets are how ever celibates. So although we are competent for our german government we decided to look at international government dynasties as exercise to find some real case law precedents. A real text law precedent is the Nicolaus resolution for example. Prey german constitutional court. However this would have been field hunt and not new. Scuba hunt is new and exciting ...

... our today morning glory offers for example to continue seamlessly from our modules 1-9 review finished with "So much regarding communication means."

more regarding communication means is contributed by CIA testimony on the biblical impeachment precedent of tricky dick which confirms the meaning of mass media for the enemy (of the mundane types).

Nonpartisan intelligence officer John Ehrman explains in his conventional (the other side from the contemplation excluding) report of the Hiss case which was fought out in the court of public opinion how conventional (sensual) intellectual forums are abused to use intelligence as war weapon.

(compare also the equal naming dispassionate inside description of "the court of public opinion" by qualified CI(A)GoH victim Alger Hiss himself. However, intelligence officer John Ehrman who summarized the Hiss case on the CIA web side describes it very well already and from a more (personal and time) distant viewpoint. He only seems tending to consider Hiss guilty but in fact and the end leaves it open for the reader to believe this or the other version or remain wise and uninfluenced. His honest try to report unbiased information becomes credible on the last page of his report before the notes where it reads: *"Ideally, intelligence informs decisionmaking by providing facts and dispassionate analysis. In reality, however, intelligence is presented and used in a political arena in which a variety of factions and coalitions constantly seek to advance their agendas. Each party views issues from a different perspective, and, during the past 15 years, their struggles have become steadily more vicious. Because of this, **intelligence often becomes simply one more political weapon.**"* and *„Both parties have engaged in this behavior, and it is a routine, and accepted, political tactic in Washington. Intelligence officers, whose job it is to be nonpartisan, can do nothing to stop this and have to learn to live with it."*)

natural intelligence officer peter kress (who may be partisan as only soul and member of his defensive ghost war party, however, can do something to stop this behaviour and) explains in his unconventional report and analysis of his case, Kafka's Heritage, how unconventional (spiritual) intellectual forums are abused to use intelligence as war weapon. He shows the meaning of a quite busy court of public opinion as passive war weapon for head enemy cleric.

Isolation of their victims on their kill will battle fields on the other side. Mass media can be used as active weapon. Are they, then by both/all parties. However. Goliath uses the waiver of mass media as passive weapon against David. The cleric wave any argument (on behalf of their victims). This becomes perfectly disguised by a quite busy court of public opinion otherwise, the Skripal case for instance, which proves that the court still exists. A hermetical blockade unimaginable. Peter obviously insane.

And the court of public opinion is not only open to journalists its a platform for the intellectual class represented in all political directions and all intellectual state and non state professions. None of peters well known true help calls in all various relevant directions was paid attention to at all while the british pm, for instance,

viciously defended a criminal double agent, who accordingly committed double treason, against good old enemy Russia on subterrestrial intellectual levels.

Our collateral, since american not german, friendly fire prey moreover offers to look at the topic archives (6) in more general as promised.

First we learn generally to appreciate unclassified intelligence.

The term intelligence means intellectual governmental information (facts and dispassionate analysis). Owner, hence, the people if not mother earth herself according to an innovative intellectual property concept.

Why are ("current") governmental files classified? Officially because their knowledge would be a real danger to the state. Why? Because of external or internal threats? Who is direct subject to the german government? Other populations or governments or the german population? Would it therefore be a real danger for the german population to learn that it cannot trust its government? And a fifty year civil war would break out like in Nicaragua for example where dictator Somoza eventually could be evicted (to Miami at least) nevertheless? (By the way, he dug out the remains of his parents to take them to Miami too.) That's probably why. And that is the problem of government controlled military by the way.

In our case however it is going to be a violence free military coordinated revolution in the obvious interest of our people and our temporary pure military administration are certainly going to unclassify all classifications. In our own interest as well, if you like, we want to be credible and avoid never ending turmoil like in Nicaragua for instance.

I may quote officer Ehrman again. He concludes his report with the statement:

"(In the Hiss case) ... success in keeping information secret came at the price of a 40-year debate that contributed to the corrosion of the public's trust in government and faith in the honesty of its intelligence and law enforcement agencies."

Our government is same. State secretaries of Auswärtiges Amt even refused to provide expressly requested classified files for the historian commission which was appointed by their boss foreign secretary Joshka Fischer to research the role of his governmental agency in past and present.

Peter repeatedly explained how german ministers are inaugurated in their positions by their state secretaries. In crime time table part two page 3 for instance we read: "The laws are not made by elected politicians they are made by professional state

secretaries who are not elected but election immune: “And you want to tell us what and how to do and in four years we are going to do exactly the opposite? Go on dreaming!” that is what their state secretaries tell them and then the elected ministers shut up.“

Only slightly different sounds Ehrmans report here (under the headline *Fluctuating interest in espionage*): „(Whitaker) Chambers (the main witness against Hiss) sought an appointment with President Roosevelt to tell him of the USSR's espionage; he was directed instead to Assistant Secretary of State Adolf Berle, who handled such matters for Roosevelt. Berle wrote a memo recording Chambers's information but did not pass it to the FBI, and Roosevelt himself--far more concerned by the German and Japanese threats--made it clear that he did not want to hear about Soviet espionage.“

It is obvious that this can only follow from a file notice of Berle. Quite unlikely that Roosevelt ever was informed about Chambers testimony.

Kafka's Heritage is our present case. Referring Intelligence peters intellectual property. However, classified and hidden from him in PAAA. As well as Carmen's file from her by the way, who is another important victim-witness not only as the compelling complement character and protagonist in peters Romeo and Julia novel (of this notorious espionage scheme). We are not going to wait the next fifty or more years for their declassifications. In contrary, we are going to open the archives very soon and prevent further evidence suppression after the historic archive of Cologne was wrecked down in 2009 already! Serious historians worldwide agree with us.

Soldiers, I regret that time is over and to have no choice but to leave the opulent rest of our prey subject to major Toms analytical comments on our external coup environment before the background of our international mission sette colline ...

see you here again soon, comrades, and make the major go and go and go! So you are not going to be surprised when we meet next time and I deliver the mission sette colline initial order set our effective state-under-the-church-coup-action-orders ...

... applause, some standing, and table knocking

(and End of episode)
